ABOUT ME

I like creativity, and this is what we as human beings can bring to the world and make better. With a few years of experience I have in software engineering helps me develop the mindset of doing whatever it takes and adding a little bit more in anything I do. That's what sets you apart from what average people get as a result.

EXPERIENCE

- **Absolutely Legacy** Oct/2022-Now

I am part of a global mentorship program here in Denmark and around the world. It is an association of successful industrial leaders who select and mentor people who value personal and professional development through various soft skills:

- Communication.
- Leadership.
- Financial literacy.
- Time prioritization.
- Critical thinking.
- Team building.
- Personal growth.
- Health and well-being (preventive health).
- Etc...

- **Coalescent Mobile Robotics** Jan/2023-Mai/2023

I worked with my colleague to create a proof of concept for a new design and workflow for the control of robots in the fleet, and generally to improve the user experience regarding authentication and app usability.

- Collecting and reporting on fleet events (mission started, ended, duration, distance travelled, etc.).
- Evaluating the persistence of map location to improve the usability of the web app.
- Displaying colour-coded store pickup and drop-off locations on a map.
- Investigating strategies for transporting event data from the fleet system to secure storage.
- General styling of new pages in the web app.
- Single sign-on authentication.

- **The Fabric of my life** July/2022-Dec/2022

Redesigned the UI of the current website, by adding some new features and animations so it can be more pleasant for the user. Refactored the code base of the software to the current version of the framework used.

- **Ating Aps** July/2020-Oct/2020

- Develop and design the software of the company using ReactJS, NodeJS, Express, MongoDB, and Material UI.
- Maintain and update the software to the latest technology.
- Identify problems uncovered by customer feedback and testing, and correct or refer problems to appropriate personnel for correction.

- **RoomKast APs** Dec/2021-Apr/2022

- Using ReactJS, JavaScript and CSS to bring concepts to life.
- Optimizing the user experience.
- Developing and maintaining the user interface. Implementing design on mobile websites.
- Creating tools that improve site interaction regardless of the browser.
- Managing software workflow.
- Following SEO best practices.
- Fixing bugs and testing for usability.

PROJECTS

Live here: <https://protein-calculator-lyart.vercel.app/>

Protein calculator application:

This is a protein calculator that helps people to know how much protein they get daily according to the meals they are having.

Live here: <https://online-resume-flame.vercel.app/>

My portfolio:

This is the online version of my résumé

Live here: <https://financial-projection.vercel.app/>

Financial projection application:

This is a financial projection application that helps people to know their financial situation from the present day to their retirement plan. It gives an idea of whether the vehicle they choose will help them achieve the quality of life they want. I have used Next.js, TypeScript, and Tailwind CSS with other libraries.

Live here: <https://business-app-steel.vercel.app/>

Business application:

This is a business application to help people in different ways. Their career, professional, their preventive health, and their personal development. I have used NextJS, TypeScript, and Tailwind CSS to build the application.

EDUCATION

- **HackYourFuture Aug/2021-Nov/2021**

Serverless course

- **CPH: learning Jan/2019-June/2020**

Introduction to the Danish labor market

- **HackYourFuture Aug/2019-Apr/2020**

Fullstack web development

- **Institut Supérieur de Gestion Aug/2005-June/2008**

Audit and Accounting
